

# healthy bodies, happy kids!

nutrition for the next generation

## A Growing Need

One of the biggest factors in childhood development is nutrition. Data shows inadequate child nutrition hinders growth, leads to poor grades and increases illness susceptibility.

Key nutrients are essential to the development of a child's brain, eyes and nervous system. Unfortunately, the modern child's diet includes many over-processed foods. Today's kids may not get the complete array of vitamins, minerals, protein and micronutrients to reach their full potential. That's why Reliv NOW® for Kids covers more than just the basics.

## Give Them the Best

Compare NOW® for Kids to the most popular children's multivitamin pills. Notice anything different? NOW® for Kids is a powdered supplement that delivers a balanced array of nutrients in a liquid shake rather than a pill, enabling quicker, more complete absorption.

Next, look at the label. NOW® for Kids is packed with cutting-edge nutrients. A special proprietary blend of advanced ingredients is designed to boost kids' nutritional intake.

Reliv products are not intended to diagnose, treat, cure or prevent any disease or medical condition. Vitamin supplements should not replace a balanced diet.
