

your nutritional approach to joint health

A Movement in Joint Health

Our joints are the centre of every move we make. But more and more people report some type of joint problem. These joint issues make it difficult to maintain an active lifestyle — whether you're a world-class athlete or simply finding it harder to move freely as you age.

Fortunately, science has discovered an array of nutrients that provide nutritional support for joints. You could mix and match bottles of vitamin pills. Or, you can get optimal levels of more than 20 powerful ingredients in one convenient, highly absorbable Arthafect® shake.

Nutrition Breakthrough

Hydrolyzed Collagen Protein: consists of the same series of amino acids that form the framework of human cartilage and are required for its generation.

Aloe Vera, Cat's Claw and Borage Oil: to assist with joint and muscle swelling.

Ashwagandha: herb that helps reduce inflammation and relieves discomfort.

Dual Action

More than simply a solution to a problem, Arthafect® may also provide prevention for the future — allowing you to maintain your healthy, active lifestyle.

Short-term. Greater comfort means you can continue to move freely.

Long-term function. Whether you're a marathon runner or a casual golfer, your joints will suffer wear and tear over the years.

Reliv products are not intended to diagnose, treat, cure or prevent any disease or medical condition.
